Isolator – Negative

Product reference	
Part No.	55000-720APO
Manufacturer	Apollo

Product overview

The Isolator is placed at intervals on the loop and ensures that, in the case of a short circuit, only the section between the isolators will be affected. When the short-circuit is removed, the isolators automatically restore power and data to the isolated section. Supplier product-family illustration for article 55000-720APO. Shown components do not establish the supply scope.

Technical specifications	
Product depth	24mm
Product diameter	100mm
Storage temperature	-30 to 80°C
